DEPARTMENT PROMOTE PREVENT PROTECT

# Crack & Cocaine Warning

---

Looks Legit  
But Can  
Cause Fatal  
Overdose

---

Crack and cocaine in Connecticut have been found to contain fentanyl and/or xylazine, which can cause fatal overdose.

---

# Most Street Drugs Contain Fentanyl

a powerful opioid that can quickly cause an overdose.

---

If you or someone you know is using any of the following street drugs, they may contain fentanyl.

- Cocaine & Crack
- Heroin
- Methamphetamine
- Prescription pills like Adderall, Xanax, or Opioids like Oxycodone or Percocet
- MDMA

Remember: Never use drugs alone, test your products for fentanyl prior to using, use slowly, carry Naloxone and call 9-1-1 if you suspect an overdose is occurring.
